Home Grinder Pump Maintenance and Repairs

The following are four contractors that service low pressure grinder pumps systems:

<u>Contractor</u>	<u>Owner</u>	<u>Location</u>	<u>Telephone #</u>
SMART	Rick Morse	Prescott	928-227-2091
Western Environmental Technologies	Bob Hanus	Prescott	928-277-1543 602-327-3460(cell)
Yavapai Water Production	Kimble McClymonds	Prescott	928-899-3794 928-771-9461(Home)

Maintain Your Grinder Pump

1. Don't put anything down the toilet except human waste and toilet paper.
2. **Do not allow contractors/workmen to clean equipment for paint, concrete, grout, etc. using the home's sinks or toilets where it will enter the sewer system and cause considerable damage to the property owner's system and/or community system that could cost the home owner thousands of dollars.**
3. Use a laundry detergent instead of soap.
4. Make sure your garbage disposal is working properly.
5. Pour Simple Green or other like product down a toilet every couple of months.
6. Consider installing a PVC wedge brace on your Meyers pump if you live on the south side of S Lakeview and Golden Hawk.
